

**Maria Teresa Llanos** was born in Venezuela. She is the founder of **Artere Zone, LLC** was launched in 2018 to capture the genuine emotions of family and corporate events. Her company offers professional photography, photo booths, video production, and design. They do everything with passion! We would like through words to express everything we feel for photography, it seems not to be so easy but we will try. Photography is the illusion and the engine of our lives; in photography, we find most of the moments that make us happy. We created this "art zone" – hence its name "Artere Zone" – with the intention of merging photography with other types of art and taking it to its maximum expression. Photography transcends; it is a universal language; it connects us without needing to be together. Artere Zone is open to the integration and development of various artists to bring our clients the best of photography. We love diversity and multiculturalism. We are growing and experiencing new ideas to share our passion, hoping to be a part of your story.
